

# INFLATABLE COSTUME INSTRUCTIONS

1. Carefully unpack the inflatable costume from its carrying case.
2. Gently unroll the costume and spread out on the floor. Be careful not to lay the unit down on sharp surfaces or other surfaces that might score or leave scuff marks on the costume.
3. Locate the battery harness and place over your shoulders. The battery should either hang in front or on the side of the costume wearer.
4. Attach the battery power cords to the battery harness and battery. The battery cords are located inside the zipper that contains the intake blower for the costume.

5. Once the cords are attached you will hear the fan start to work and it will start to intake air into the unit.
6. The wearer should now sit on the ground and carefully slide each leg into the costume.
7. After the legs are inserted, carefully place arms, body and head inside the costume always being aware of where the power cords rest.
8. Once the wearer is inside, someone should help "zip them in" to the unit. Carefully zip up the zipper and fold the flap of Velcro over the zipper to secure it closed.
9. The costume is now ready for use.
10. The costume wearer should practice and become aware of the unit before going out and displaying its power of advertising.
11. If you have any questions, please contact your distributor.

**DO NOT USE IN WET CONDITIONS AS THE WARRANTY DOES NOT COVER USE!!!**
