HOW TO INSTALL THE ELBOW BANNER

- 1** - Remove the Ground Stake from the carry bag for installation into the ground, dirt or soft surface. [If you need to mount the unit indoors or on a hard surface (IE. Concrete/blacktop) you will need a Ground Support Platform Stand. Please contact your distributor for assistance.]
- 2** - Using a rubber mallet, drive the Ground Stake into the grass or soft ground about 11"-13" deep. (Try to drive the Ground Stake perpendicular into the grass or soft ground. This will make sure the Elbow Banner is installed properly and will stand erect like designed.)
- 3** - Locate & remove all support pole sections. Insert the smallest support pole into the next size wider in diameter. Pole size diameter will decrease as you move up from the bottom of the pole set.
- 4** - Once all of the support pole sections are pieced together, place the pole aside and locate the Elbow Banner flag. Open the Elbow Banner flag and find the bottom part of the black sleeve with two grommets inserted/attached. This is the bottom part of your Elbow Banner flag.
- 5** - Locate the support pole and gently feed the Elbow Banner flag black sleeve down the support pole by entering the smallest diameter pole into the sleeve first. Once inserted, connect these poles to the "L" shaped pole located in the top sleeve of the flag.
- 6** - Simply place the Elbow Banner on top of the Ground Stake and set-up is complete.
